

Frontend Developer

We are looking for a Front-End Web Developer (Junior / Senior) with an eye for design who is motivated to build interactive products with cutting edge technologies.

Responsibilities will include translation of the visual design or mockups into actual code which will produce the visual elements of the web-site or application. In this role you will be in constant co-operation with the UX-, QA-, design- and backend-team.

Join our team if you are as ready to learn, as you are to share what you already know.

Responsibilities

- Developing rich-client and Single Page Apps
- Responsive and adaptive web development
- Create site builds
- Building reusable components & plug-ins

Expected Skills

- ES5+ and JavaScript frameworks
- HTML5 and CSS3
- Manipulating the DOM efficiently
- Knowledge about templating and APIs
- Experience with UI-frameworks like Twitter Bootstrap, Foundation, etc.

Advantages

- ReactJS
- Redux / RXJS
- CSS pre-processors
- Unit or E2E testing
- UX or Visual Design Experience
- Version Control
- SEO
- Server side development
- Wordpress Theme or Plugin Development
- Design Systems
